For clarification purposes, the 757 Captain III variation of the software is for use with Prepar3D V4 only. The informational posting made by the developer via Facebook states not only that the manual has been updated including SDK documentation but further mentions the inclusion of feature details relating to the upcoming version 1.1 update. However, in reviewing the manual, there does not appear to be any actual information regarding the update. Further investigation clarifies that the changelog will be posted at the time of official release. According to a comment posted via the above linked Facebook post, the developer states, "We'll include the change log into the 1.1 release announcement.". Certainly a bit confusing if I do say so myself. Furthermore, for those of you interested in the status of the 32bit version of the aircraft for both FSX and earlier versions of Prepar3D, some information is available. <http://www.bicimoto.cl/admin/uploads/bosch-precision-wfg2420-manual.xml>

Highly recommend. The description by TropicalSim states that they have FULL NIGHT LIGHTING and DYNAMIC LIGHTING as part of this product and as part of my review, I mentioned that I could find NO NIGHT LIGHTING and DYNAMIC LIGHTING in the product. I am very happy to say that I have solved this problem. Initially, I installed the scenery on to my E drive and NOT to the default Prepar3D location specified by TropicalSim usually CProgram FilesLockheed MartinPrepar3D. <https://spb-velo.ru/files/bosch-pro-parquet-1800w-manual.xml>

Then I added the scenery myself using the XML method I have their FARO scenery product installed this way with no issues, opting NOT to let the installer do it. After a conversation with a very helpful chap at TropicalSim, it would seem that the EFFECTS files did not find their way into the Prepar3DEffects folder and thus no night or dynamic lighting was evident. I like to have my scenery spread across two drives so as not to fill up my C drive. I have to experiment with the install, possibly moving the effects files MANUALLY into the Prepar3DEffects folder and see if it works. But I am happy to apologise to TropicalSim and to viewers here and say that they DO INDEED have Dynamic and FULL Night Lighting in the product and it looks great. So I award five stars. Well done! This is the most accurate and authentic rendition of the 757 ever created. The systems and flight characteristics reflect those of the real airliner.

Hundreds of animations, critically acclaimed flight models, accurate avionics and a global selection of liveries. The 757 is acknowledged throughout the world as the leader in short to medium range operations. It is hugely popular with operators, crews and passengers and now a professional quality recreation of this great airliner can be flown in Flight Simulator X or 2004. This spectacular 757 expansion has been developed by the experts at Captain Sim and is a technical masterpiece. It comes in 200, 300 and freighter variants with an impressive selection of airline liveries and different engine variants. Savings represents a discount off the List Price. Ken D 3.0 out of 5 stars It loaded and I even found an update for it. It runs great! But when I had questions and wanted to login into Captain Sims forums for more information I found that they wanted a purchase code to be entered. For support of the box please contact the box publishers directly. We believe the publishers will continue sales of the remaining stocks. But please note, CS will neither support nor update the boxes. The DVD delivered is out of date software and the seller JustFlight does not offer any upgrade patch like the actual publisher CaptainSim does and they will not let anyone have access to the patch unless you repurchase directly from them. In order for the patch to work, it requires you to reinstall FSX SP1 and 2 which wiped out all the settings and other addon aircraft i had. Could have been a great product. the patch destroyed it. I uninstalled the aircraft as it was no longer useable. As mentioned in my title, this is my first payware addon for my flight simming.

Before i purchased this, i was not satisfied with the freeware 757s being offered for Flight Simulator X, i think all of them were converted from FS2004 use, and none of them had a virtual cockpit for FSX. I am getting used to flying from the flight deck rather than flying from spot view from behind the aircraft and virtual cockpit is really useful. This dvd comes with versions for both Flight Simulator 2004fs9 and Flight Simulator XFSX, comes packaged in a convenient plastic dvd case like most games being sold these days i thought it would arrive in a cardboard box like the older games did This dvd also comes with a 100 page manual that describes instruments. This addon includes the 757200 with 2 types of engines and winglet options as well as the 300 with 2 engine types and winglets as well as a freighter version. And I definantly recomend it to every one I love the planes

layout and scenery. It will be a little complex for the basic flight sim gamer but for us pilots it is the best flight sim I have played, right down to CAT 3 landings and FMC programming. The wing graphics are also a bonus and the freighter loading is incredible. So I recommend it.
